

Mercedes-Benz SL500 R129 / 500SL regenerated catalytic converter

Product codes:

Reference: REG-MERC-SL500

EAN13: -

Product features:**Product attributes:****Product description:****Regenerated catalytic converter Mercedes-Benz SL500 R129 / 500SL - EURO 2 - 400 cpsi**

The subject of the offer is the regeneration of the catalytic converter consisting of welding new metal inserts into the original housing. The dimensions have been optimally adapted to this particular car model in terms of dimensions and capacity. A combination of EURO 2 emission standard inserts in the number of 4 pieces (2 pieces per side) was used. The universal catalytic converter cartridges have a standard throughput of 400 cpsi. We used metal inserts with increased durability and resistance to mechanical damage, which ensure not only better performance, but also longer life and reliability of your catalytic converter.

The cartridge was manufactured by a reputable RFC company and has all the necessary approvals.

We offer a warranty for a period of 12 months or up to a mileage of 50,000 km.

We do the regeneration in one day and send you back the catalytic converter ready for installation.

When sending your catalytic converter to us, fill out the form:

<https://regeneracjakatalizatorow.pl/pl/content/6-regeneracja-katalizatorow>

Also, do not forget to remove the cause of faster wear of the cartridge, if its wear has occurred faster than standard the cause may be oil or fuel entering the exhaust system. If you have a gas system installed and, in addition, it is not adjusted too well, it also contributes to faster wear of the original ceramic cartridges, which are not resistant to the higher temperature of gas combustion.

If you feel up to it, you can also replace the cartridge yourself, which you can purchase using the link below:**4x RFC EURO 2 cartridge - 400 cpsi**
