**The subject of the offer is catalytic converter regeneration consisting in welding a new metal insert into the original housing.**

The dimensions of the inserts are (110/100 mm) have been optimally adapted to this particular car model in terms of diameter and length. They meet EURO 5 and EURO 2 emission standards. The universal catalytic converter cartridge used has a capacity of 500 and 200 cps. Universal catalytic converter cartridges are the ideal solution for customers looking for a balance between performance and compliance with emission standards.

The cartridge has been manufactured by the renowned RFC company and has all the necessary approvals. In addition, we offer a warranty for a period of 12 months or 50,000 km of mileage.

**We do the regeneration in one day and send you back the catalytic converter ready for installation. Sending the catalytic converter to us, fill out the form:**

Don't forget to also fix the cause of faster cartridge wear, if it has worn out faster than standard the cause could be oil or fuel entering the exhaust system. If you have a gas system installed and in addition, it is not adjusted too well, it also contributes to faster wear of the original ceramic cartridges, which are not resistant to the higher temperature of gas combustion.

**If you feel up to it, you can also replace the cartridges yourself, which you can buy from the links below:**
