

Regenerated catalytic converter Mazda 6 147 hp 2.0 2008

Product codes:

Reference: REG-MAZDA-6

EAN13: -

Product features:**Product attributes:****Product description:****Regenerated catalytic converter Mazda 6 147 hp 2.0 2008 EURO 5 - 500 cps**

The subject of the offer is the regeneration of the catalytic converter consisting of welding new metal inserts into the original housing.

The dimensions of the inserts (110/100 mm) have been optimally adapted to this particular car model in terms of diameter and length. They meet EURO 5 and EURO 2 emission standards. The universal catalyst cartridges used have a capacity of 500 cps. Universal catalytic converter cartridges are an ideal solution for customers looking for a balance between performance and compliance with emission standards.

The cartridges have been manufactured by a reputable company **RFC**. In addition, we offer a warranty for a period of 12 months or 50,000 km of mileage.

We do the regeneration in one day and send you back the catalytic converter ready for installation. Send your catalytic converter to us by filling out the form:

- <https://regeneracjakatalizatorow.pl/en/content/6-regeneration-catalysts>

Don't forget to fix the cause of faster cartridge wear, too; if it has worn out faster than standard, the cause could be oil or fuel entering the exhaust system. If you have a gas system installed and in addition, it is not adjusted too well, it also contributes to faster wear of the original ceramic cartridges, which are not resistant to the higher temperature of gas combustion.

If you feel up to it, you can also replace the cartridges yourself, they are available at the link below:
